Re: WT Docket 94-102  
TTY Quarterly Report 2003  
Wireless II, L.L.C. d/b/a Nebraska Wireless Telephone Company

Dear Ms. Dortch:

On behalf of Wireless II, L.L.C. d/b/a Nebraska Wireless Telephone Company ("Nebraska Wireless") this letter is submitted to report the status of the company's implementation of the capability to transmit 911 calls from text telephone ("TTY") devices.

Nebraska Wireless is a digital wireless carrier operating personal communications services in rural Nebraska. The company's Petition For Waiver And Extension of Digital Wireless 911 TTY Requirements requested an extension of time to comply through December 31, 2004. Originally, Nebraska Wireless sought an extension in order to have additional time to upgrade its switch from MTX09 to MTX10. However, in November 2002 Nebraska Wireless entered into a contract to be purchased by Northeast Colorado Cellular, Inc. ("NECCI"). Since then, NECCI has decided to change Nebraska Wireless's operating technology from CDMA to GSM.

Nebraska Wireless is currently in process of putting in a GSM switch. Once that is complete Nebraska Wireless will start setting down GSM cell sites and make the cut over to GSM technology. At this time, Nebraska Wireless is hopeful that it will be able to make the cut over to GSM by the end of this year, however, significant equipment replacement and testing has to be done in order for this process to be complete.

According to Nebraska Wireless's equipment manufacturer, Nokia, the GSM handsets to be used by Nebraska Wireless customers after the cut over are already E911/TTY compliant. Therefore, once Nebraska Wireless can complete the technology change to GSM, customers will receive E911/TTY compliant handsets for use in time to meet the December 31, 2004 extension deadline.
